PATENT CLAIMS

- 1. A method of preparing a trace element solution, which includes the steps
 - (a) of providing at least one EDTA-complex;
 - (b) of providing a sodium selenite solution; and
 - (c) of combining the EDTA-complex(es) and the sodium selenite
- A method as claimed in claim 1, in which more than one EDTA-complex
 is used and in which these EDTA-complexes are prepared in a single
 continuous process.
- A method as claimed in claim 1, in which the EDTA-complex is prepared by using disodium EDTA.
- A method as claimed in claim 1, in which the EDTA-complex is prepared by using EDTA acid.
- A method as claimed in claim 1, in which the EDTA-complex is prepared
 by using at least one selected from the group consisting of metal oxides,
 metal hydroxides and metal carbonates.
 - A method as claimed in claim 1, in which the EDTA-complex includes at least one of the metal compounds selected from the group consisting of copper, manganese, zinc, molybdenum and chromium.
- 20 7. A trace element solution as prepared by a method as claimed in claim 1.
 - 8. A trace element solution, which includes
 - (a) at least one EDTA complex prepared by using disodium EDTA or EDTA acid;

- (b) selenium; and
- (c) any other suitable mineral.
- 9. A solution as claimed in claim 8, which is an injectable solution.
- 10. A solution as claimed in claim 8, which is a drenchable solution.
- 5 11. A stock lick, which includes
 - (a) at least one EDTA complex prepared by using disodium EDTA or EDTA acid;
 - (b) selenium; and
 - (c) any other suitable mineral.
 - 12. A method of providing trace elements to animals, such as livestock, which includes the steps of preparing a trace element solution as claimed in claim 1, and of providing the solution in a suitable quantity to an animal.
